

Mobile Requirements

Skillsoft's mobile solution includes the following:

- **Skillport Mobile:** This application has a subset of Skillport's learning management system (LMS) functionality and is primarily designed for working with mobile content.
- **Skillsoft Mobile Player:** This application allows you to launch and play assets in modern, HTML5-compliant browsers, on smartphones, tablets, and desktops.
- **Skillsoft Learning App:** This smartphone application allows you to launch and play videos, books, audio books, and summaries from the Skillsoft Library that you are entitled to on your Skillport 8 site.
- **NOTE:** The Skillsoft Learning App is only supported on iOS 9.x or higher, and Android 4.4.2 or higher on Skillport 8.

To enable mobile course play, you must turn off pop-up blockers. For instructions, see [Allow Pop-ups](#), or see your device's user instructions.

These applications support the following configurations **on smartphones**:

Operating System	Browser
Android 4.4.2 and later	Chrome Browser
Apple iOS 9.x+	Native mobile Safari browser only

These applications support the following configurations **on tablets**:

Operating System	Browser
Android 4.4.2 and later	<p>Chrome browser</p> <div style="text-align: center;">  <p>Note: Samsung Galaxy Note 10 users must use Google Chrome as the native browser is not supported.</p> <p>Samsung 7" tablets are not supported.</p> </div>

Operating System	Browser
Apple iOS 9.x+	Native mobile Safari browser
Windows 8.1, 10	Native browser
